

LIZ
INK

AFTERCARE GUIDE

After your tattoo, I will cover it
with a latex-free, transparent,
tattoo bandage

I use Recovery After Care
Derm Shield

You can leave this on between
2 - 7 days

@LIZ__INK

It's normal to see ink and fluid
underneath

After 2-7 days, remove it in the
shower by pulling it downwards
(like a command strip)

Lightly wash your tattoo with
antibacterial soap

@LIZ__INK

For the first 2-3 days, avoid heavy sweating or exercise

For the next two weeks after your tattoo, avoid direct sun or going to the beach/pool/saunas as it heals

Showers are okay and recommended!

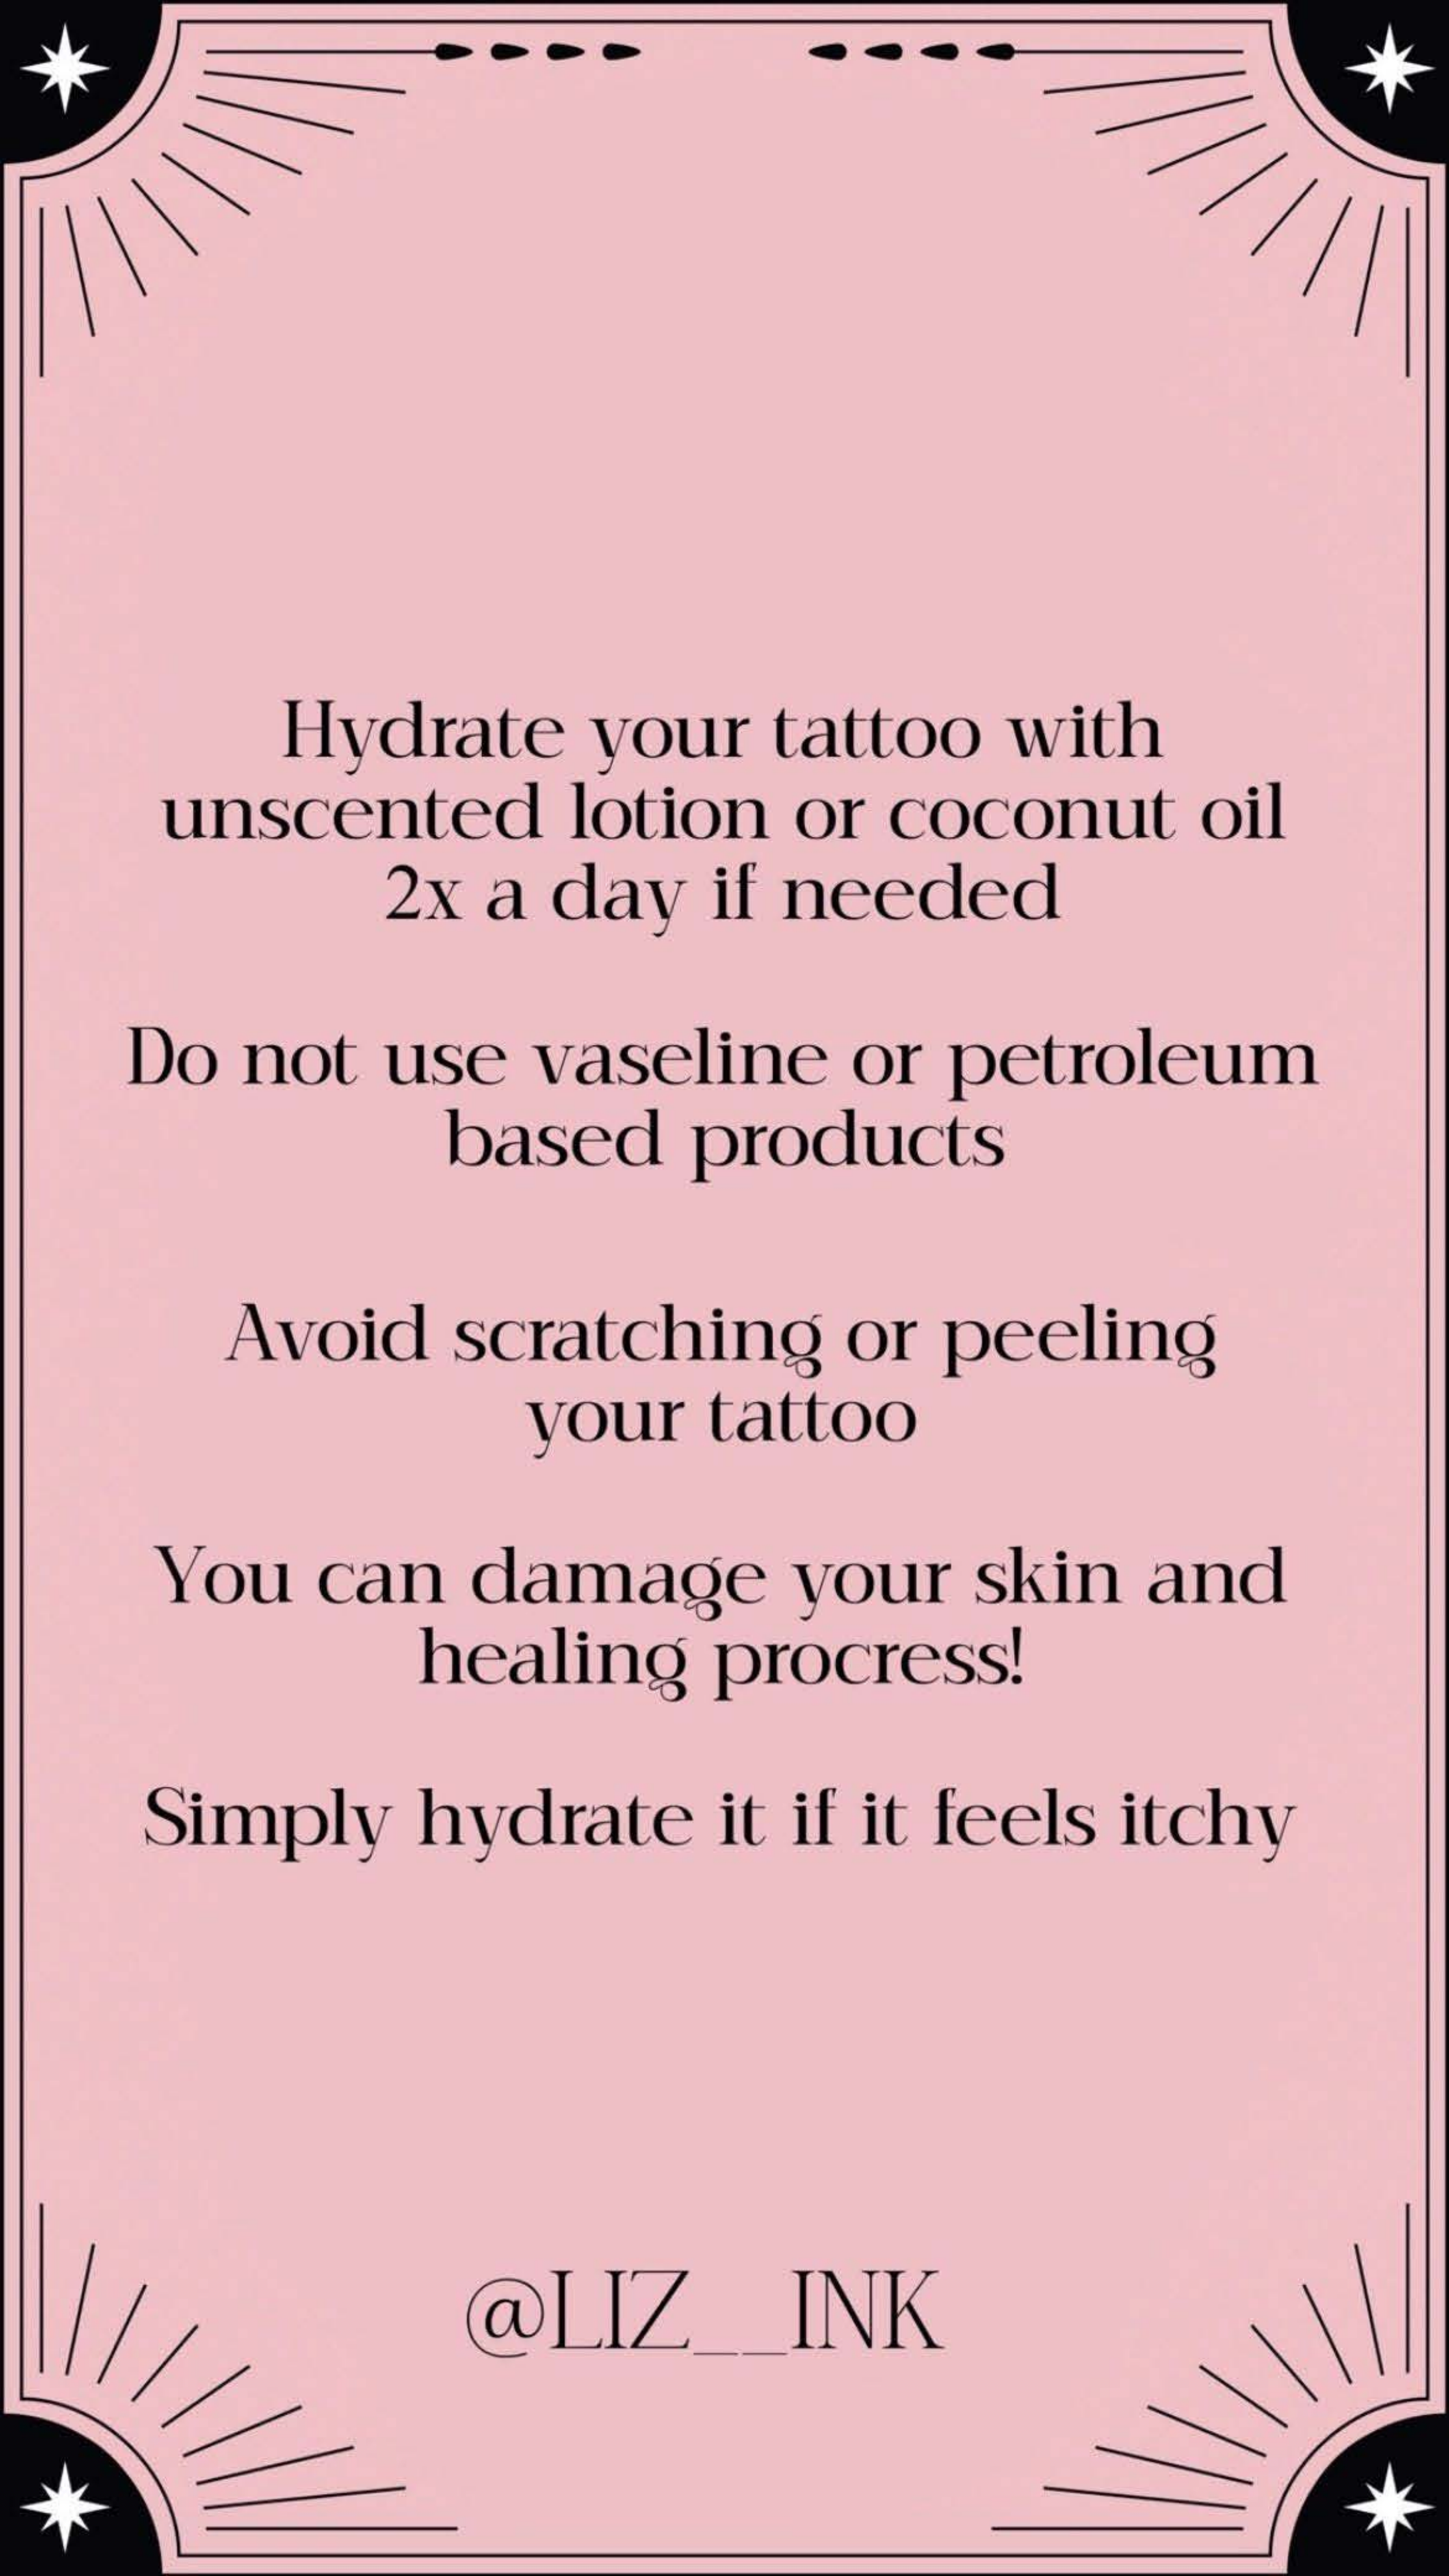

@LIZ__INK

If you notice any itching,
burning or redness (especially
around the bandage), you may
be allergic to the Derm Shield

Remove it ASAP

@LIZ__INK

Hydrate your tattoo with
unscented lotion or coconut oil
2x a day if needed

Do not use vaseline or petroleum
based products

Avoid scratching or peeling
your tattoo

You can damage your skin and
healing process!

Simply hydrate it if it feels itchy

@LIZ__INK
